Modification des paramètres de mémoire de traduction

Supposez que vous voulez modifier les paramètres de mémoire de traduction pour créer un champ qui spécifie si l'unité de traduction est utilisée dans des publications que vous imprimez ou dans des publications en ligne. Vous pouvez modifier la mémoire de traduction dans la boîte de dialogue **Paramètres de mémoire de traduction**.

Utilisez la mémoire de traduction *Sample EN-DE* que vous avez créée dans l'exercice précédent.

1. Pour modifier les paramètres de la mémoire de traduction, celle-ci doit être fermée dans l'éditeur face à face de MT. Si votre mémoire de traduction est encore ouverte pour maintenance, cliquez sur le **X** en haut à droite de l'éditeur face à face de MT pour fermer la session de maintenance actuelle. La mémoire de traduction est fermée dans l'éditeur face à face de MT, mais reste dans le volet de navigation.

Cliquez pour fermer la session de maintenance actuelle.

Sample EN-DE	◄ ► ▼ X
(No translation units to display.)	(No translation units to display.)

2. Cliquez avec le bouton droit sur la mémoire de traduction, *Sample EN-DE* dans l'arborescence de navigation sous **Mémoires de traduction** et sélectionnez **Paramètres** dans le menu contextuel ou dans le menu **Fichier**. Voici la mémoire de traduction que vous avez créée dans l'exercice précédent.

La boîte de dialogue **Paramètres de mémoire de traduction** s'affiche.
